

The **WXD-20** accessory for the Line Array ACD-3008 and ACD-3012 columns allows to cover the RJ45 connection and the front LEDs against the inclemency of the weather.

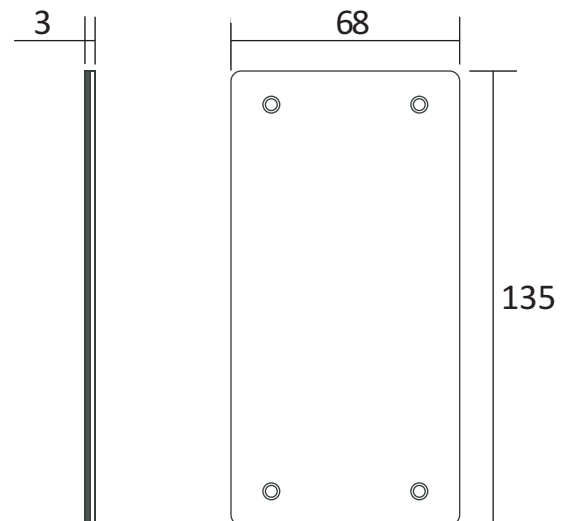

Includes high density foam throughout the surface to ensure tightness.

Suplied accessories

- 4 screws M3 DIN 7985
- High density foam

All the fasteners are stainless steel suitable for outdoor areas and humid environments

DIMENSIONS IN MILLIMETERS

Installation

- 1 Remove the caps protecting the threads on the front of the column.
- 2 Join the cover and the high density foam by removing the protective paper from the foam. Align the holes in the foam correctly with the holes in the cover.
- 3 Screw on the cover using the DIN 7985 M3 screws supplied.
